Missed targets make emission
reduction targets steeper

CO₂ reductions needed to keep global temperature rise below 1.5°C

Annual emissions of carbon dioxide under various mitigation scenarios to keep global average temperature rise below 1.5°C. Scenarios are based on the CO₂ reductions necessary if mitigation had started – with global emissions peaking and quickly reducing – in the given year.

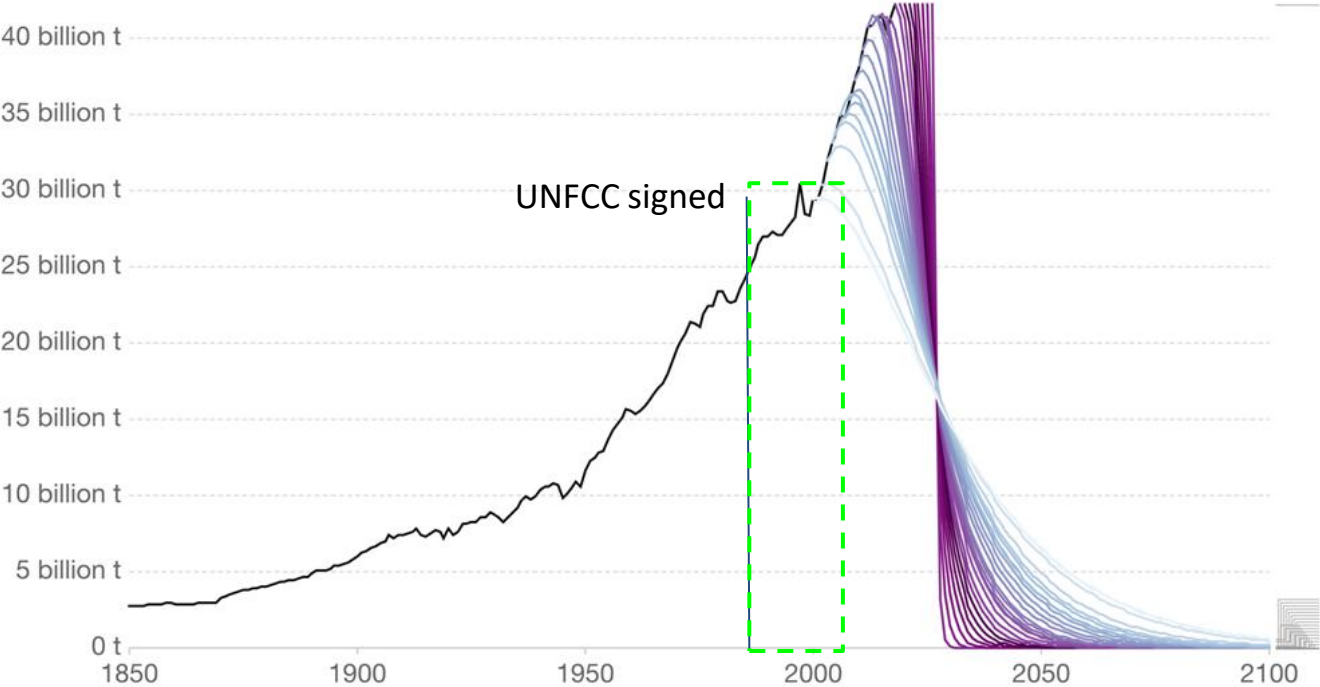

Source: Robbie Andrews (2019); based on Global Carbon Project & IPCC SR15

Note: Carbon budgets are based on a >66% chance of staying below 1.5°C from the IPCC's SR15 Report.

Global primary energy consumption by source

Primary energy is calculated based on the 'substitution method' which takes account of the inefficiencies in fossil fuel production by converting non-fossil energy into the energy inputs required if they had the same conversion losses as fossil fuels.

THE ENERGY CHARTER TREATY

The world's most dangerous investment agreement

- fully applies to 48 countries
- dozens from Africa, Asia and Latin America about to sign

Rich countries no delivering on the
promises on adaptation

MISSED TARGET

Rich countries promised developing nations
US\$100 billion a year in climate finance by 2020.

■ Bilateral finance ■ Multilateral finance* ■ Export credits ■ Private finance

*Including financing through multilateral development banks.

Refugees are people who have fled war, violence, conflict or persecution and have crossed an international border to find safety in another country.

They often have had to flee with little more than the clothes on their back, leaving behind homes, possessions, jobs and loved ones.

Refugees are defined and protected in international law. The [1951 Refugee Convention](#) is a key legal document and defines a refugee as:

“someone who is unable or unwilling to return to their country of origin owing to a well-founded fear of being persecuted for reasons of race, religion, nationality, membership of a particular social group, or political opinion.”

How do we solve this problem?

- Solutions will come from the bottom upwards
- We need to engage civil society in every country
- It is very important we engage with the trade unions
