Transition?

- Which one
- From where to where
- Who proposes it
- Who leads it
- With whom
- What for
- About what
- How
- What consequences

TRANSITION = **energy** transition

TRANSITION = **energy** transition

Corruption + debt = more oil extraction = the most beautiful waterfall is gone = 120.000 people affected by oil pollution = soon the power plant will stop working + 7.000 cracks and fissures + platform collapse

Or for the Ecuadorian government:
Transition = Circular economy or
= Ecuador Carbono Cero

TRANSITION = Carbon Neutral = Zero Emissions = Net Zero

Governments and businesses now have an opportunity to take a critical, collective step to arrest this decline:
TO AGREE TO PROTECT AT LEAST 30% OF THE WORLD ON LAND AND SEA.

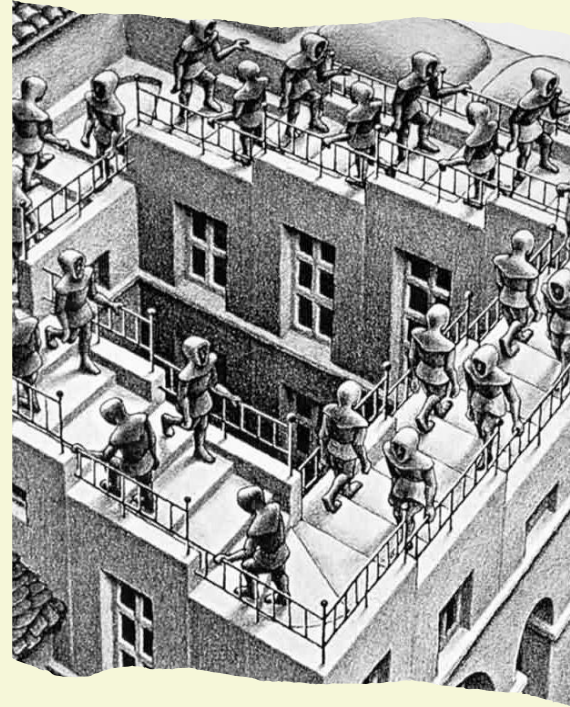

**THE NEW GREEN REVOLUTION:
A JUST TRANSITION TO CLIMATE-SMART CROPS**
